Dr. McKay Jenkins  
Tilghman Professor of English  
Department of English  
University of Delaware

Dear Dr. Jenkins:

As associate chair for the Department of Animal and Food Sciences and chair of our courses and curriculum committee I have evaluated the proposal for the new interdisciplinary Environmental Humanities. On behalf of the ANFS department I support this minor and the interesting breadth of knowledge it will bring to students who select it to further their education at the University of Delaware. We are happy to have two courses listed as choices within this engaging minor.

Sincerely,

Kali Kniel, Ph.D.  
Associate Chair, Department of Animal and Food Sciences
