

To: Professor Louis Rossi
Department of Mathematical Sciences

From: Errol Lloyd, Chair CIS *E.L Lloyd*

Date: January 29, 2013

Subject: Support for proposed changes in your major requirements

The Department of Computer and Information Sciences fully supports the proposed changes in each of the following as they pertain to course offerings of the CIS Department:

- 0236 – Revise major BA Mathematical Science
- 0237 – Revise major BS Mathematics Education
- 0238 – Revise major BS Quantitative Biology
- 0239 – Revise major BA Mathematics Education
- 0240 – Revise major BS Mathematics and Economics
- 0241 – Revise major BS Mathematical Sciences

We believe that these changes will provide your students with a more consistent and applicable experience in programming theory and practice. In addition since the CIS courses taken by your students will be more predictable, these changes will make it easier for the CIS Department to schedule our lower level courses.
