UNIVERSITY FACULTY SENATE FORMS

Academic Program Approval

This form is a routing document for the approval of new and revised academic programs. Proposing department should complete this form. For more information, call the Faculty Senate Office at 831-2921.

Submitted by: Norbert Mulders______________________ phone number_3517________

Department: _Physics and Astronomy______________email address_mulders@udel.edu

Action: __Revise Physics Minor________________________________________

(Example: add major/minor/concentration, delete major/minor/concentration, revise major/minor/concentration, academic unit name change, request for permanent status, policy change, etc.)

Effective term____08F___________________________________________

(use format 04F, 05)

Current degree_________________________________________________________

(Example: BA, BACH, BACJ, HBA, EDD, MA, MBA, etc.)

Proposed change leads to the degree of: ______________________________________

(Example: BA, BACH, BACJ, HBA, EDD, MA, MBA, etc.)

Proposed name:_________________________________________________________

Proposed new name for revised or new major / minor / concentration / academic unit
(if applicable)

Revising or Deleting:

Undergraduate major / Concentration:________________________________________

(Example: Applied Music – Instrumental degree BMAS)

Undergraduate minor:______Physics_________________________________________

(Example: African Studies, Business Administration, English, Leadership, etc.)

Graduate Program Policy statement change:___________________________

(Must attach your Graduate Program Policy Statement)

Graduate Program of Study:__________________________________________

(Example: Animal Science: MS Animal Science: PHD Economics: MA Economics: PHD)

Graduate minor / concentration:__________________________________________

Note: all graduate studies proposals must include an electronic copy of the Graduate Program Policy Document, highlighting the changes made to the original policy document.

List new courses required for the new or revised curriculum. How do they support the overall program objectives of the major/minor/concentrations)?

(Be aware that approval of the curriculum is dependent upon these courses successfully passing through
the Course Challenge list. If there are no new courses enter “None”.

NONE

Explain, when appropriate, how this new/revised curriculum supports the 10 goals of undergraduate education: [http://www.ugs.udel.edu/gened/](http://www.ugs.udel.edu/gened/)

Identify other units affected by the proposed changes:
(Attach permission from the affected units. If no other unit is affected, enter “None”)

NONE

Describe the rationale for the proposed program change(s):
(Explain your reasons for creating, revising, or deleting the curriculum or program.)

PHYS469/669, Observational Astronomy, is a course that focuses exclusively on Astronomical observation and has limited physics content. The course really belongs in with the Astronomy Minor that we are proposing.

PHYS245 is a course exclusively for Mechanical engineering majors, which has considerable overlap with PHYS208. There is no reason to ask students who have taken PHYS245 to take in addition PHYS208 to fulfill a minor in physics.

Program Requirements:
(Show the new or revised curriculum as it should appear in the Course Catalog. If this is a revision, be sure to indicate the changes being made to the current curriculum and include a side-by-side comparison of the credit distribution before and after the proposed change.)

Current version
MINOR IN PHYSICS

Students in other majors can declare a physics minor, consisting of PHYS 207-208 plus 9 credits from PHYS courses at or above the 300 level. Students considering minoring in physics should consult the physics associate chair for advice on prerequisites for these courses and for assignment to an adviser.

Proposed version
MINOR IN PHYSICS

Students in other majors can declare a physics minor, consisting of PHYS207 and PHYS208 or PHYS245 plus 9 credits from PHYS courses at or above the 300 level. PHYS469/PHYS669, Observational Astronomy cannot be used to fulfill course requirement for this minor. Students considering a minor in physics should consult the Director of the Physics and Astronomy Undergraduate Programs for advice on prerequisites for these courses and for assignment to an adviser.
