UNIVERSITY FACULTY SENATE FORMS

Academic Program Approval

This form is a routing document for the approval of new and revised academic programs. Proposing department should complete this form. For more information, call the Faculty Senate Office at 831-2921.

Submitted by: John L. Burmeister phone number: 302-831-1130

Department: Chemistry and Biochemistry email address: jlburn@udel.edu

Action: Revise courses required for BACHEM degree
(Example: add major/minor/concentration, delete major/minor/concentration, revise major/minor/concentration, academic unit name change, request for permanent status, policy change, etc.)

Effective term: 09F
(use format 04F, 05W)

Current degree: B.A. in Chemistry
(Example: BA, BACH, BACI, HBA, EDD, MA, MBA, etc.)

Proposed change leads to the degree of:
(Example: BA, BACH, BACI, HBA, EDD, MA, MBA, etc.)

Proposed name: ______________________________________________________________________
Proposed new name for revised or new major / minor / concentration / academic unit
(if applicable)

Revising:

Undergraduate major / Concentration: B.A. in Chemistry
(Example: Applied Music – Instrumental degree BMAS)

Undergraduate minor: ______________________________________________________________________
(Example: African Studies, Business Administration, English, Leadership, etc.)

Graduate Program Policy statement change: ______________________________________________________________________
(Must attach your Graduate Program Policy Statement)

Graduate Program of Study: ______________________________________________________________________
(Example: Animal Science: MS Animal Science: PHD Economics: MA Economics: PHD)

Graduate minor / concentration: ______________________________________________________________________

Note: all graduate studies proposals must include an electronic copy of the Graduate Program Policy Document, highlighting the changes made to the original policy document.
List new courses required for the new or revised curriculum. How do they support the overall program objectives of the major/minor/concentrations?  
(Be aware that approval of the curriculum is dependent upon these courses successfully passing through the Course Challenge list. If there are no new courses enter “None”)  

Replace: CHEM-165 Freshman Majors Seminar (0 credits FYE requirement) with the new course CHEM-115 Introduction to Chemical Sciences (2 credits, DLE requirement) – see rationale below.  
Add: CHEM-465 Senior Seminar (1 credit, fall term).  

Explain, when appropriate, how this new/revised curriculum supports the 10 goals of undergraduate education: http://www.ugs.udel.edu/gened/  

It addresses all of the Goals of Undergraduate Education, except for #8 and #9.  

Identify other units affected by the proposed changes:  
(Attach permission from the affected units. If no other unit is affected, enter “None”)  

None  

Describe the rationale for the proposed program change(s):  
(Explain your reasons for creating, revising, or deleting the curriculum or program.)  

For decades, freshman BS/CHEM, BS/BIOC, and BS/CHEG majors were in lockstep, as far as their required freshman CHEM courses (CHEM-111/112/119/120) were concerned. That changed in 940, when CHEM-120 Quantitative Chemistry was dropped from the BS/CHEG curriculum. The other shoe will drop during the 2008-2009 academic year, with the removal of CHEM-119 Quantitative Chemistry from BS/CHEG curriculum. (Beginning with the Class of 2012, BS/CHEG majors will take CHEM-220/221 Quantitative Analysis during their sophomore year.)  

These major changes have caused our Department to reevaluate the first-year program for our CHEM, BIOC, and XCE majors. We have concluded that they will be better served by CHEM-115, which incorporates and enlarges upon the content of CHEM-165, our Freshman Majors Seminar (for all of our majors – BA/CHEM, BA/XCE, BS/CHEM, and BS/BIOC), and replaces the set of relatively sophisticated CHEM-119 laboratory experiments with a more basic set which is better suited for the needs and background of our freshman BS/CHEM and BS/BIOC majors.  

CHEM-115 will therefore satisfy the FYE requirement of all of our CHEM/BIOC/XCE majors, as was the case for CHEM-165.  

CHEM-115 Introduction to Chemical Sciences:  
Lecture & discussion, 2 credits; lecture & discussion & lab, 3 credits. Introduction to the CHEM/BIOC Department and the chemical professions: curricula, sub-disciplines, related areas, research, and career opportunities. Social events and mentoring. Group calculator and computer sessions, discussions, and presentations. Experimental techniques and procedures.  

The course addresses two main objectives, as outlined above:  
It will fulfill the FYE requirement for all of our BA/CHEM, BA/XCE, BS/CHEM, and BS/BIOC majors.  
It will also lay the experimental groundwork for our BS/CHEM and BS/BIOC majors.  

(Extended discussions with Prof. Raul Lobo, of the CHEG Department contributed significantly to the changes outlined above.)  

Since its inception, many years ago, our BA/CHEM curriculum has lacked a capstone course requirement. The addition of CHEM=465 Senior Seminar will remedy this omission.
DEGREE: BACHELOR OF ARTS
MAJOR: CHEMISTRY

CURRICULUM

See page 90 for University and College requirements.

MAJOR REQUIREMENTS
A minimum grade C- is required in each CHEM course required for the BA degree in Chemistry.

CHEM 145 Freshman Seminar: Chemistry .......................... 3
CHEM 103/104 General Chemistry .................................. 8
CHEM 220/221 Quantitative Analysis and Laboratory ........... 4
or CHEM 145

CHEM 222/223 Quantitative Chemistry ............................... 6
CHEM 321/322 Organic Chemistry .................................. 8
or CHEM 331/332/334 Organic Chemistry and Laboratory I and II . 10
CHEM 347/438 Instrumental Methods and Laboratory ........... 4
CHEM 418/445 Introductory Physical Chemistry and Laboratory ... 7
or CHEM 443/444/445 Physical Chemistry and Laboratory ........ 7

One of the following eight courses: .................................. 3
CHEM 410 History of Chemistry
CHEM 457 Inorganic Chemistry
CHEM 527 Introductory Biochemistry
CHEM 620 Analytical Spectroscopy
CHEM 622 Electroanalytical Chemistry
CHEM 623 Chemometrics
CHEM 633 Advanced Organic Chemistry: Physical
CHEM 634 Advanced Organic Chemistry: Synthesis and Reactivity

MATH 241 Analytic Geometry and Calculus A .......................... 4
MATH 242 Analytic Geometry and Calculus B[strongly recommended] .................................................. 4
PHYS 201/202 Introductory Physics I and II ......................... 8
or PHYS 207/208 Fundamentals of Physics I and II ................. 8

ELECTIVES
After required courses are completed, sufficient elective credits must be taken to meet the minimum credit requirement for the degree.

CREDITS TO TOTAL A MINIMUM OF ......................... 124
Program Requirements:
(Show the new or revised curriculum as it should appear in the Course Catalog. If this is a revision, be sure to indicate the changes being made to the current curriculum and include a side-by-side comparison of the credit distribution before and after the proposed change.)

ROUTING AND AUTHORIZATION: (Please do not remove supporting documentation.)
