ACADEMIC PROGRAM APPROVAL
CHECKLIST

This form is a routing document for the approval of new and revised academic programs. Page 2 will serve as an attachment to the Faculty Senate agenda. Proposing department should complete form, attach as a cover page and forward to the college dean. Documentation should include copy of curriculum as it is to appear in the Undergraduate and Graduate Catalog. Proposals must arrive to the Undergraduate/Graduate Committee by November in order to reach the Faculty Senate by March 1. Proposals received after this date cannot be implemented the following year nor included in the catalog for that year.

1. Proposed change leads to the degree of
   ( ) Bachelor of Arts
   (XX) Master of Arts
   ( ) Doctor of Philosophy
   ( ) Bachelor of Science
   ( ) Master of Science
   ( ) Other:

2. ( ) New major/curriculum
   Title to be entered in record of students who select this program
   ( ) New minor
   Title to be entered in record of students who select this program
   ( ) Change from provisional to permanent status.

3. (x) Revision of existing:  (x) major    ( ) minor    ( ) concentration
   Present title: M.A. DEGREE IN SCHOOL PSYCHOLOGY
   Records System Program Code
   (XX) Add/delete required courses/credit hours
   ( ) Add concentration
   Title
   ( ) Delete concentration
   Title

4. ( ) Deletion of existing/disestablish:  ( ) major    ( ) minor    ( ) other
   Title
   Code

5. ( ) Policy Change
   Title/Department

ROUTING AND APPROVALS: (Please do not remove supporting documentation.)

a. Rationale for creation, revision, or deletion:

The School of Education is requesting a series of course changes to the current program including:

- Eliminate 2 courses from the M.A. degree in School Psychology (EDUC 660 Educational Statistics and Measurement and EDUC 680 Educational Diagnosis), and add one new course in their place (EDUC 744 Educational Measurement and Progress Monitoring).
- Eliminate one additional course from the M.A. degree in School Psychology (EDUC 658, Classroom Management and Discipline) and revise and move one course from the Ed.S. in School Psychology to the M.A. (EDUC 830, Consultation and Intervention: School Discipline).

Background:
We poll our graduating students as well as past graduates from the program about program strengths and needs. Several program needs have come to our attention including 1) the need to learn assessment and progress monitoring skills necessary for the implementation of Response to Intervention regulations (RTI); 2) training in assessment and intervention with special populations including young children and children with low incidence disabilities; and 3) additional opportunities for implementing and receiving feedback on consultation skills.

Change #1: Eliminate EDUC 660 & EDUC 680 and Add EDUC 744

The school psychology faculty which includes a member of the National Association of School Psychologists (NASP/NCATE) Program Approval Board know of no school psychology specialist level programs that require a stand alone course in measurement (currently EDUC 660). Therefore we propose teaching our students measurement in the context of testing and assessment (proposed course EDUC 744) and eliminating EDUC 660 as a program requirement. By making this change it will allow greater flexibility in the curriculum to accommodate other program needs.

Recent federal legislation and state regulations no longer require the use of the discrepancy formula (determining an intelligence-achievement discrepancy) to determine disability status. Instead, the degree to which students respond to instruction/interventions (as determined through progress monitoring with curriculum-based measures) applied in the regular education setting will be used to determine student programming and in great part disability status. The school psychology faculty would like to replace the required 680 class (for school psychology students) which covers measurement principles but does not go into enough depth in the areas of curriculum-based assessment and progress monitoring for our students. A new course EDUC 744 would also fill a need in the school psychology program to replace the measurement content that students lose by no longer taking EDUC 660. The proposed EDUC 744 course would also eliminate redundant content that our students receive in the current EDUC 680 including information about intelligence testing. Our students take a semester long course on intelligence testing EDUC 817.

Change #2: Eliminate EDUC 658, and revising (and resequencing) EDUC 830 Consultation and Intervention: School Discipline.

Currently, students in the school psychology program are required to take EDUC 830 Consultation and Intervention and EDUC 658, Classroom Management and School Discipline. EDUC 658 is tailored primarily to the needs of classroom teachers. As consultants to teachers and schools, school psychologists need basic skills of consultation and collaboration and much greater knowledge of effective individual and group interventions for preventing and remediating problems of school discipline. Additionally, school psychologists need to learn
theory, research, and more advanced skills to consult at the systems level in order to address preventive mental health, school crises, communication and collaboration with families, and community mental health. Although those topics now receive some attention in EDUC 830, they require much greater attention. Given that the role of school psychologists is changing to include more consultation it seems that this skill should receive greater emphasis in our curriculum as well. Currently we offer only 1 course in consultation while we offer 3 courses in assessment and 2 in counseling. Thus, it is proposed that students now take two courses in consultation, with the first (revised 830) covering basic skills of consultation and collaboration within the context of working with teachers and schools on matters of school discipline. The second, new course (EDUC 841, Consultation and Intervention: Mental Health) would focus on those areas listed above with an emphasis on mental health prevention. This new course will be added to the proposed changes for the Ed.S. degree in School Psychology which is also being submitted to Faculty Senate for review this academic year.

Change #3: Move EDUC 691 from the Ed.S. to the M.A. degree in School Psychology.

In conjunction with the other program revisions listed above, we would move this course from the first semester of the Ed.S. degree to the second semester of the M.A. degree. There are no course revisions requested for this course; it would simply be moved to maintain a 30 credit master of arts degree.

b. Summary of proposed program with changes:

**FIRST YEAR: MASTERS OF ARTS**

*COMPREHENSIVE EXAM REQUIRED AT END OF M.A. DEGREE*

Total credits in M.A. = 30 credits

*The completion of the M.A. does not convey certification as a school psychologist. To be
certified, students must complete the second year coursework and the third year supervised internship and must then apply for certification in the state in which they wish to practice. The University’s Institutional Recommendation is issued at the successful completion of the supervised internship.

**SECOND and THIRD YEARS: Education Specialist Degree in School Psychology**

The following table showing the proposed changes to the Ed.S. in School Psychology is provided for clarity only since the M.A. and Ed.S. in School Psychology are considered linked. These changes will be explained more fully in the accompanying Academic Program Approval Checklist for the Ed.S. in School Psychology. All students who complete the M.A. in School Psychology continue on to the Ed.S. in School Psychology.
