Subject: Re: Questions About UGS 0220 and 0221

To: Fred Hofstetter <fth@udel.edu>

Cc: Tripp Shenton <shenton@udel.edu>

Fred,

I can only answer for UGS0221 (minor in Environmental Sustainability). FREC 343 is a definite addition to the list of sustainability-related breadth courses. We would be hesitant to add FREC100 since all the other courses are at least 300-level to provide significant challenge in the minor. A 100-level course would not be consistent in this regard and could also lead to an imbalance in enrollment.

I'm out of the country, but let me know if a phone conversation would be in order and I'll make the necessary arrangements.

I'm copying Tripp Shenton who will coordinate a response re UGS0222 (minor in Sustainable Infrastructure).

Steve

Dear Steven,

In my role as UGS chair, I have a couple of questions for you regarding proposals UGS 0220 and 0221 that you see on the UGS agenda at <http://www.facsen.udel.edu/sites/agendas/UGSAGENDA2013Jan14.htm>.

First, in UGS 0220, would you be willing to add to the list of possible electives the courses FREC 100 (Sustainable Development) as well as FREC 343 (Environmental Economics)?

Second, in UGS 0221, would you be willing to include FREC 100 as a breadth course and also include FREC 343 as a possible elective?

I am copying this message to Karren Helsel-Spry of the Faculty Senate and to Steven Hastings, who is the UGS committee member who made these suggestions. UGS often is the forum where these kinds of

interdepartmental connections get made and additional electives get added to curricula. Please hit Reply All to let us know if you think these are good ideas.

All the best,

Fred
