Thank you for giving us an opportunity to review and discuss your proposed minor. I am very pleased to offer the support of the HDFS Department for the proposed Health, Physical Activity, and Disability minor. We also give permission to have HDFS 270: Families and Developmental Disabilities included in the list of possible electives (3 credits). An opportunity to understand disabilities within a family context will be very helpful for the minors. In addition, we believe this minor will be of great value for our Human Services majors pursuing a Community Education concentration, and will provide them with the skills to offer inclusive physical activities for children and youth.
